

Joint Release of the MAAMA and the MedCorp Compliance Network.

Distribution to present and former members of the MAAMA and MedCorp Compliance Network

We are pleased to announce that we have completed our approvals for an opportunity for medical practices and/or multidisciplinary practices who have reasonable medical physician presence to perform electrodiagnostic testing in a fully compliant manner. The program we are recommending is offered by RMG, Inc, an approved Academy Corporate Affiliate and, like their knee injection program, has received the necessary legal review to insure that the program is “fully within” all regulatory and ethical standards. Full training and support is provided for both the medical doctors and the technicians who will do the actual work.

The program is designed for you to perform NCV, SSEP and, if you like, EMG testing.

RMG’s EDX Program is a unique, professionally managed opportunity for the physician

- RMG trains members of your existing staff and certifies them upon completion of our training.
- Technicians are trained in your office with your patients.
- There is no additional space required other than your current exam rooms
- Equipment is the size of a laptop.
- Physicians participate in an on-line seminar and are invited to attend additional seminars in Orlando FL, where they will be invited to join the AANEM after completion of an advanced study in EDX Medicine.
- Education to Physicians and staff is provided for proper ordering and documentation of the tests performed.
- Quality control of each test performed in your office is supervised by Board Certified technicians to ensure completeness and quality assurance.
- Over read reports by Board Certified physicians are provided in 3-5 working days.
- Instruction on approved CPT and ICD 9 coding and answers to billing questions.
- Reactivation alerts for repeat testing, usually required annually (Diabetes).
- HIPPA compliant database for storage and easy tracking of all reports.
- Full library of peer review articles and instructional videos for review.
- Assistance in procuring equipment at wholesale cost.

Every aspect of the operation has been thoroughly tested and provides the physician confidence in his newly developed EDX ancillary service.

As you are all aware, approval and endorsement of ANY program through our Academy and the MedCorp Compliance Network is extremely rare. There are no half measures with Dr. Ramsdell and he will not pass on any “plan” that is not completely above board and properly structured to be fully compliant with all regulatory and ethical issues.

We congratulate RMG on developing this program and applaud their diligence in getting everything “right”. We are confident that the program will open new doors to many of our member practices.

If you are interested in expanding your practice scope and have a medical physician either full time or almost full time, we strongly suggest you investigate this opportunity. We suggest you view the FAQ the company has provided at <http://www.rmgrehab.com/faq/edx-faq.asp> .

Your Academy contact is Dr. Mark Lee at RMG, Inc. in South Carolina at 843.676.9634

Don't forget to mention that you are a member of the MAAMA.

I am pleased to present this opportunity to the MAAMA membership. I have several MedCorp clients who have been using the program for some time and I have complete confidence in this final structure. I am pleased to recommend it to you with my full blessings. Naturally, I am giving you my blessings ONLY IF you stick to the program that Dr. Lee and RMG have proven. Follow their program and you will succeed. They are offering you every tool you need to institute this program in your practice and the ongoing support needed to achieve and maintain profitability and avoid any carrier challenges. I urge you to look at this program as an opportunity to expand your scope and practice income in a legitimate and compliant manner.

Neither the Academy, the compliance network or any officer thereof has any financial interest in RMG, Inc or receives any remuneration of any kind for our endorsement or recommendation of this opportunity or the ultimate acceptance of any members participation.
